About ServiceBridge

ServiceBridge extends the capabilities of the field service management and accounting software into the field to fulfill the vital needs of a modern day service company. Business owners can now spend more time growing their businesses and less time managing them with features that automate work order distribution, map job locations and provide driving directions, enable access to pricing schedules, simplify the process of storing and collecting photos and signatures, and allow the creation of new work orders.

Companies in the United States, Canada, United Kingdom, and Australia use ServiceBridge as a part of their day-to-day business operations. Our customer base consists of businesses in various service industries such as cleaning, delivery, landscaping, communication, pest control, HVAC, construction, plumbing, equipment maintenance, paper shredding, pool maintenance, security, and many more. Business owners have found that by using ServiceBridge they reduce their time spent managing staff, speed up invoicing, escalate technician productivity, and increase customer satisfaction.

When you're in the service industry, being organized, informative and communicative is key to satisfying your clients. As a customer-focused company, we strive to consistently please our clients through operating by the same principles. Whether it’s answering your questions, implementing your requested changes or fixing a problem you’re having, our goal is to help your business achieve results.

Getting Started

Downloading the App

To download the ServiceBridge app you need to go to the app store on your mobile device.

1. Click on App Store
2. Type in ServiceBridge
3. Click install

Once installed it will show up on your app list on your phone. To connect your phone to the ServiceBridge application you will first need to find the Device ID and enter it in the Device Settings.

Table of Contents

Locating the Device ID

After you download ServiceBridge app to your iPhone or iPad device. Open the app, and the Device ID will be displayed at the top of the screen.

Restore purchased ServiceBridge subscription using Subscription ID number displayed in About section of parent device.
Restore Purchased Subscription

Connecting the Mobile device to the ServiceBridge App

Once you found your Device ID you can connect your mobile device to the ServiceBridge application. To begin you need to log in to your Servicebridge.com account.

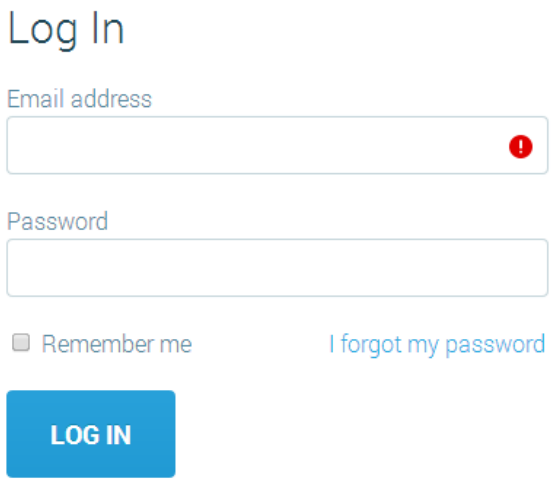

Table of Contents

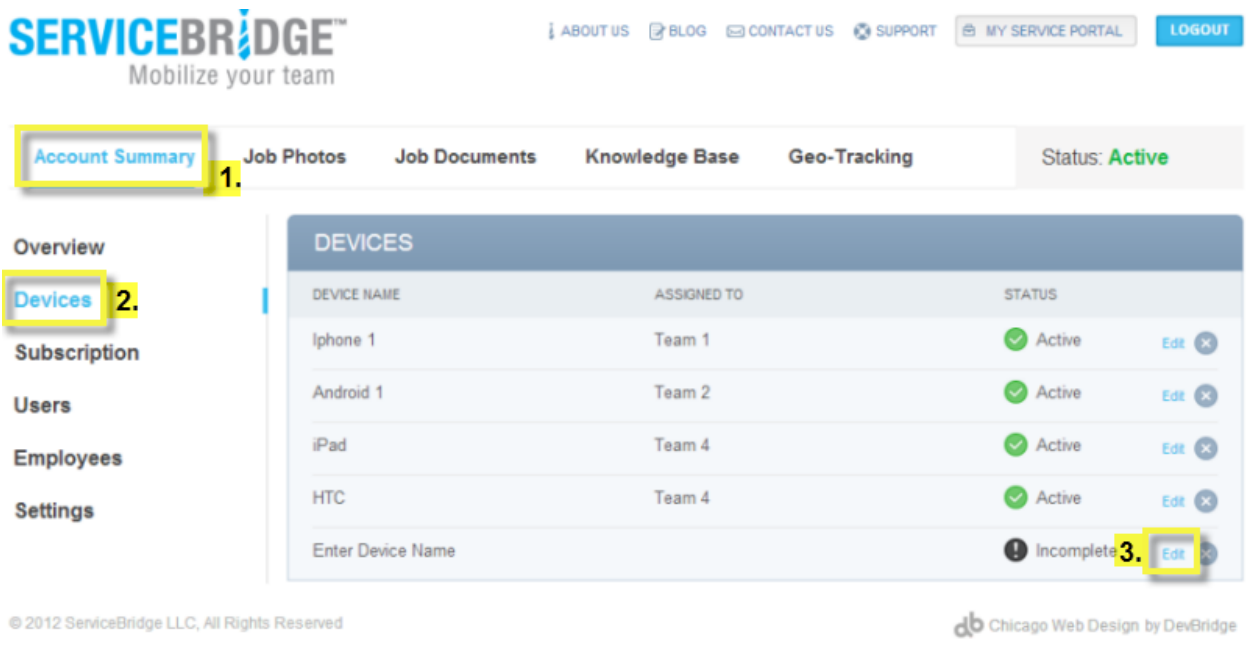
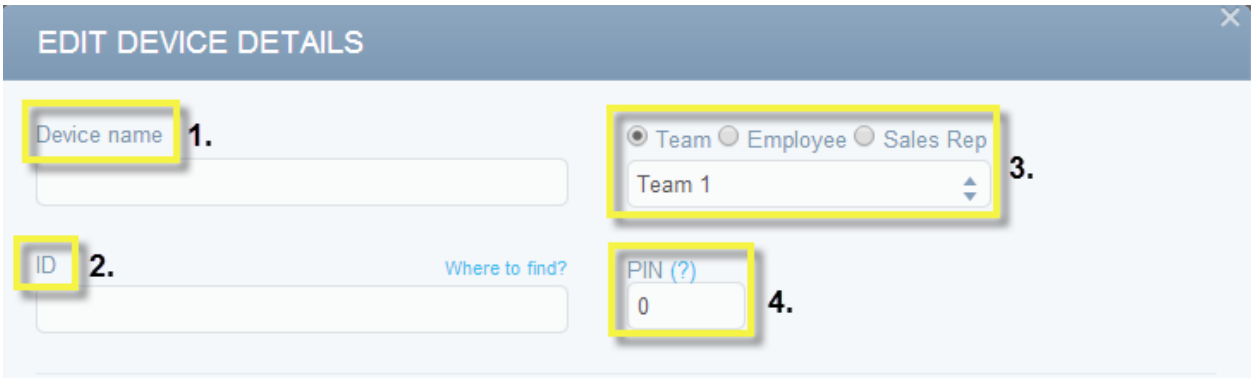
After you log in it will take you into your ServiceBridge Portal where you can access your device settings and configure your device.



1. Click on Account Summary
2. Devices
3. Edit



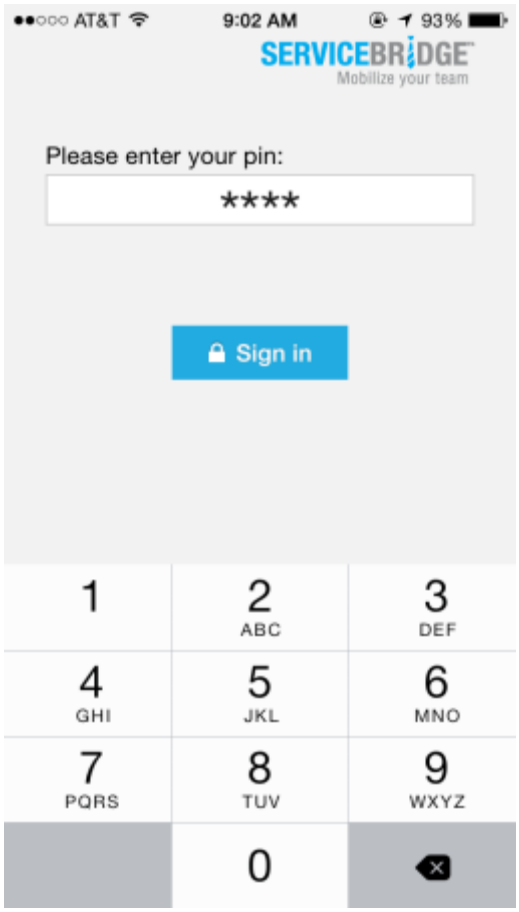
1. Enter the Device name
2. Enter the Device ID the exact same way it shows (Including dashes)
3. Assign the Team that will be using this device
4. Enter a Pin so the team can log into the app

Once all the information is put in and the device settings selected, click save and your device will now be synced to the ServiceBridge portal.

Table of Contents

Signing in using the PIN

After you connect your device with the Device ID you will open up the app and it will ask you to enter the PIN number that you assigned for that device.



Enter the PIN and click Sign In.

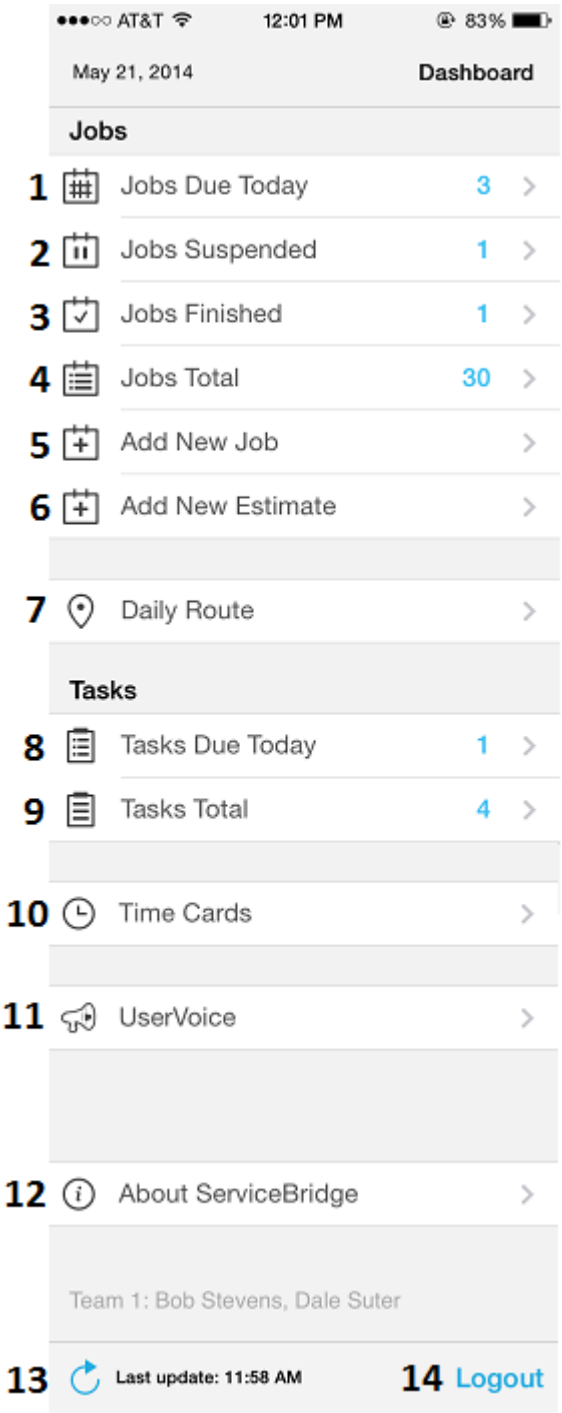
Once signed in, your ServiceBridge app will open up your Dashboard where you can begin adding jobs, estimates, and all of the other features of the ServiceBridge application.

Table of Contents

The Basics

Dashboard Overview

After signing in to your ServiceBridge app you will see what is called the Dashboard. From the Dashboard you can begin using the features that ServiceBridge offers.



1. Jobs Due Today - You can view all of the jobs due today.

2. Jobs Suspended - You can view all of the jobs that have been suspended.

3. Jobs Finished - You can view all of the finished jobs today.

4. Jobs Total - You can view all of your jobs past, present, and future.

5. Add New Job - You can add a new job.

6. Add New Estimate - You can add a new estimate.

7. Daily Route - You can view all of your job locations and fastest routes.

8. Tasks Due Today- You can view all of your task that need to be done today.

9. Tasks Total - You can view all of your tasks past. present, and future.

10. Time Cards - You can view your time cards here.

11. UserVoice - You can leave your feedback and support for ServiceBridge.

12. About ServiceBridge - You can view your Device ID and read about or app.

13. Refresh Button - The refresh button allows you to re-sync with your ServiceCEO database.

14. Logout Button - Logs you out of the app.

Table of Contents

Jobs Due Today

The Jobs Due Today tab allows you to see all of what is planned for the day. All of your jobs, estimates, and projects will be displayed here for that current day. From there you can click on each specific job and see the job in further detail.

ServiceBridge mobile app connects to popular field service management systems and accounting software, including ServiceCEO, ProBusinessTools, and QuickBooks, to allow instant access to customer and job information on a mobile device in the field.
Review job details, contact a customer, update job's status, read notes, collect payment information and signature, capture photos and much more. All data is synced with your database in real time.
Speed up the invoicing and reduce staff management time, escalate technician productivity and ensure customer satisfaction by mobilizing your team with ServiceBridge mobile app.
Purchase ServiceBridge subscription via Apple App Store below.
Subscribe via App Store
Restore purchased ServiceBridge subscription using Subscription ID number displayed in About section of parent device.

Table of Contents

Refresh and Logout

Refresh

The Refresh button allows you to re-sync any changes you have made which will allow you to gather data from the ServiceCEO database and send it to the database from the ServiceBridge app.

Logout

The Logout button allows you to log out of the application and will ask you to enter the PIN number again in order to access the application again.

Table of Contents

Supervisor Role

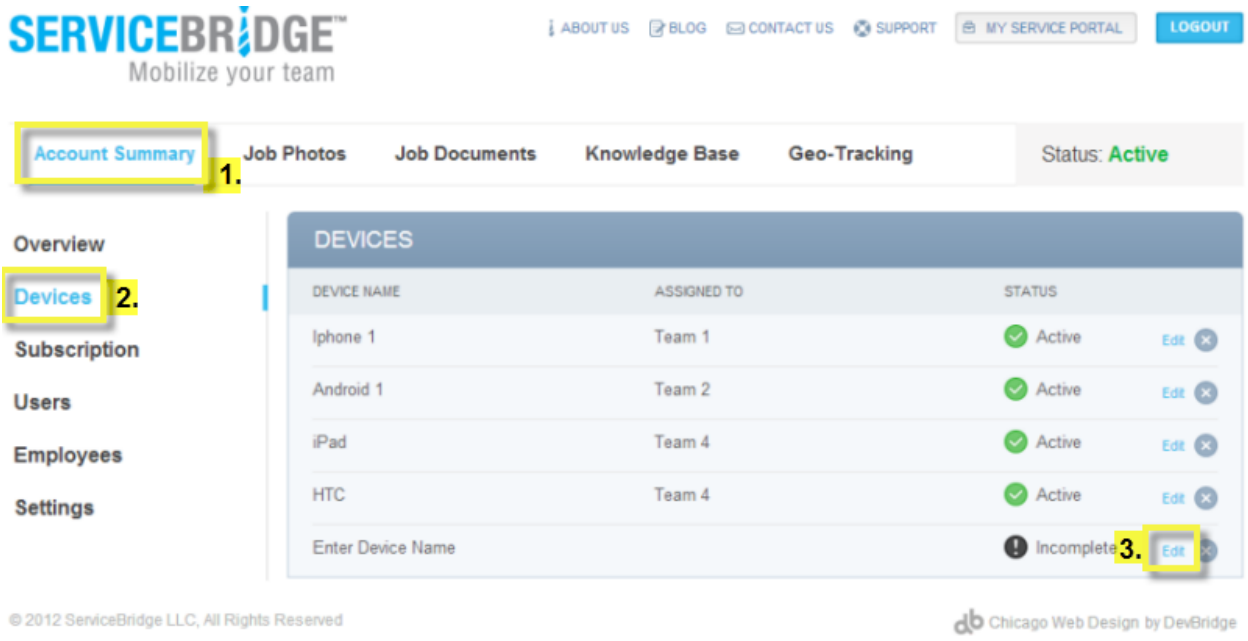
Description

Supervisor Role is a tool to manage team performance while still working in the field. The feature allows supervisors to view multiple team schedules 7 days back and 30 days in advance. Supervisors can reschedule jobs or reassign work orders to other teams. Operation managers can administer which teams the supervisor has access to. Work order status is displayed in the supervisor job list to provide a summary of daily or weekly job performance.

Supervisor Role allows you to make any changes you wish to your jobs while you are in the field. You don't have to be at a computer with ServiceCEO open to make these changes. Once a change is made with Supervisor Role it is submitted and synced with ServiceCEO

Enabling Supervisor Role

To enable Supervisor Role for your device you will need to log in to the Service Portal on your web browser.



1. Go to Account Summary
2. Devices
3. Select the device you want to Edit

Table of Contents

After you click Edit a window will pop-up with the Device Settings. You need to scroll down until you see Supervisor Role.

1. Click Enable Supervisor Role.
2. And select which teams Supervisor Role will be allowed to see and change.
3. Click Save

Accessing Supervisor Role View

Once Supervisor Role is enabled from your Service Portal you will be able to view the feature from your mobile app. Open up you dashboard and it will be the first thing on the top.

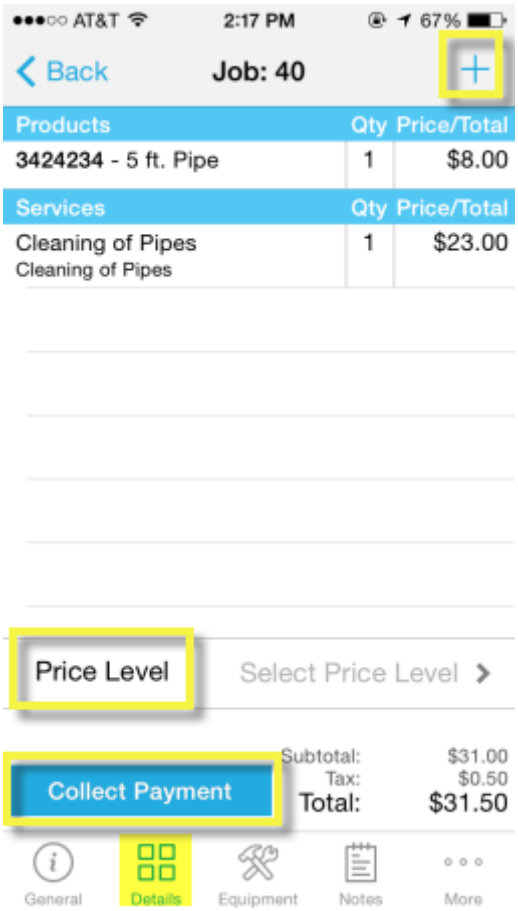
Details Tab

From the details tab you can view and add services, products, and kits as well as the quantity and price for each item. You can also scan a barcode, select price levels, and collect payments from the details tab.

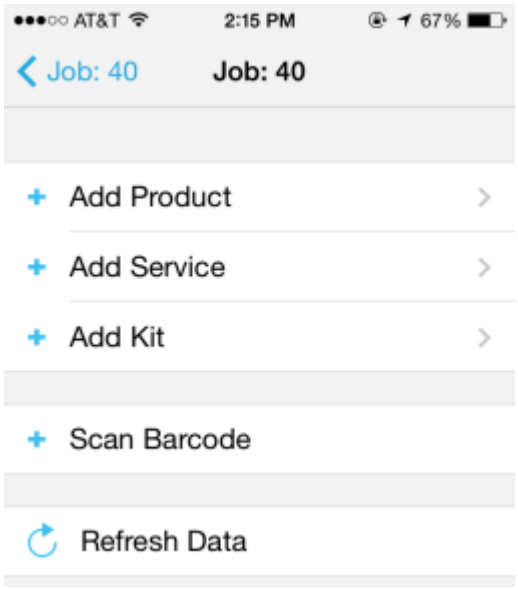


From the **Details Tab** you can view the products, services, and/or kits that are selected for each job. You can also:

1. Add a new product, service, or kit.
2. Add a Price Level
3. Collect Payment

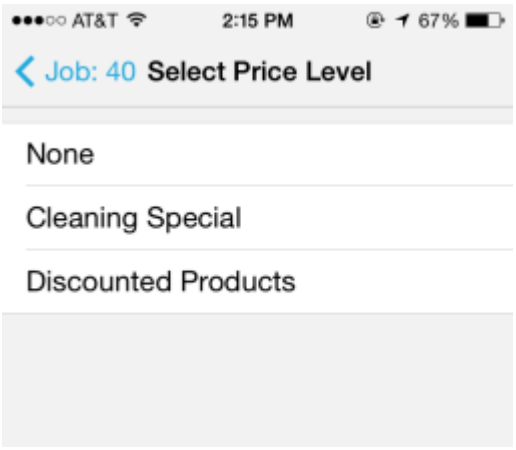
Table of Contents

1.



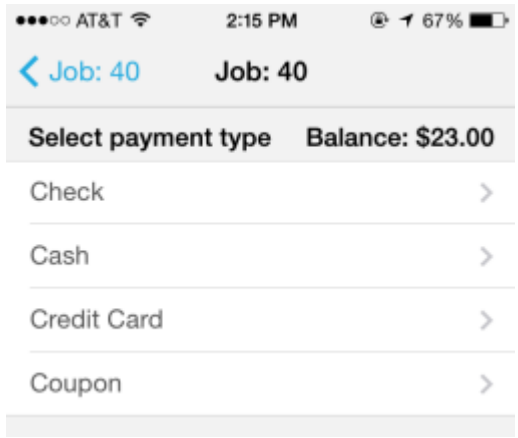
Add Product, Service, or Kit

2.



Select Price Level

3.

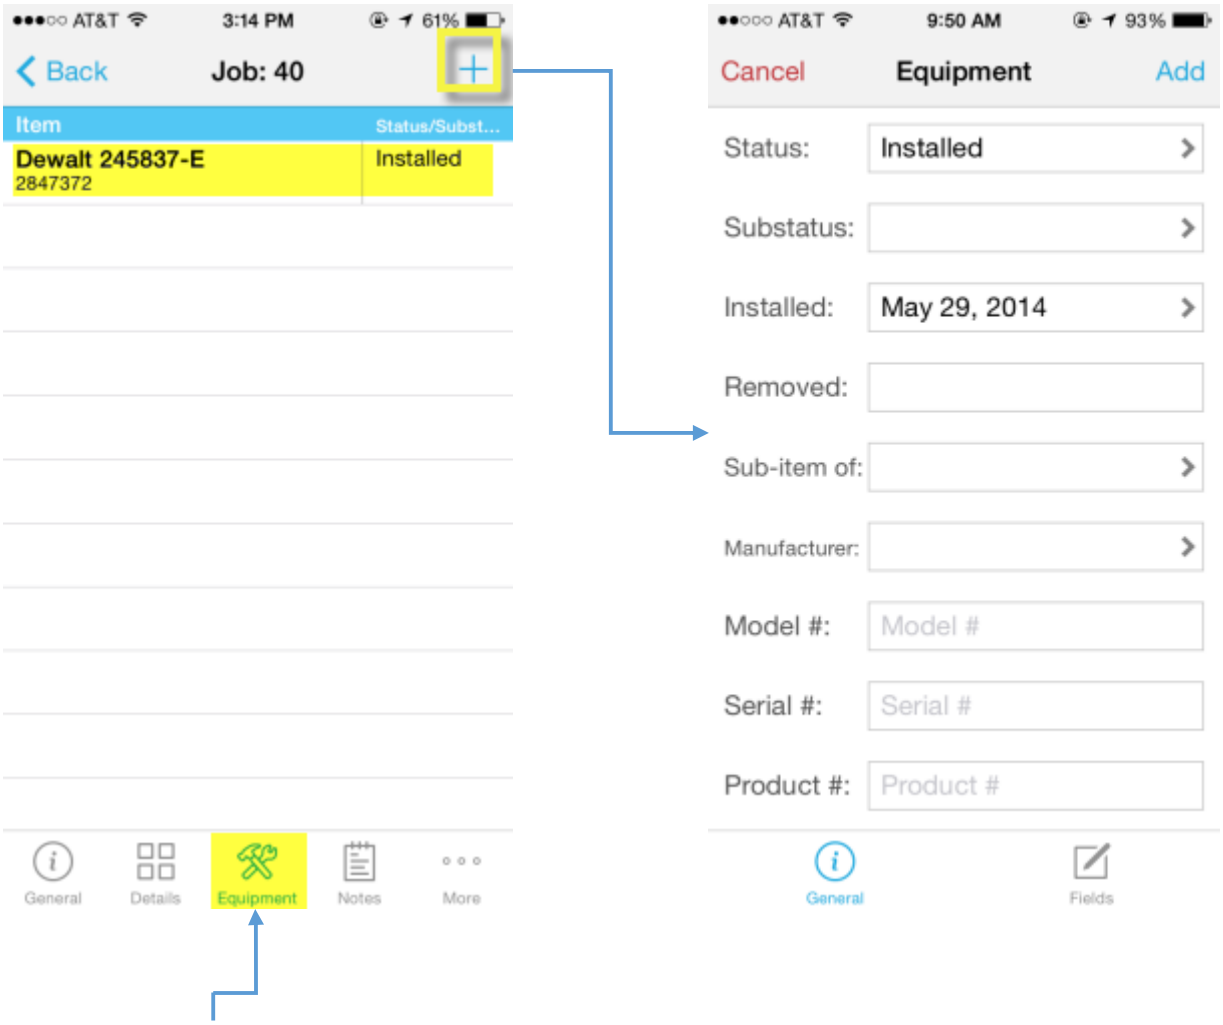


Collect Payment

Table of Contents

Equipment Tab

Let's you view all of the equipment that has been installed or replaced for that specific job. It also lets you add any additional equipment as need be.



From the **Equipment Tab** you can click the"+" in the top right corner which will open up another window where you can enter all of the new equipment's information.

Table of Contents

Notes Tab

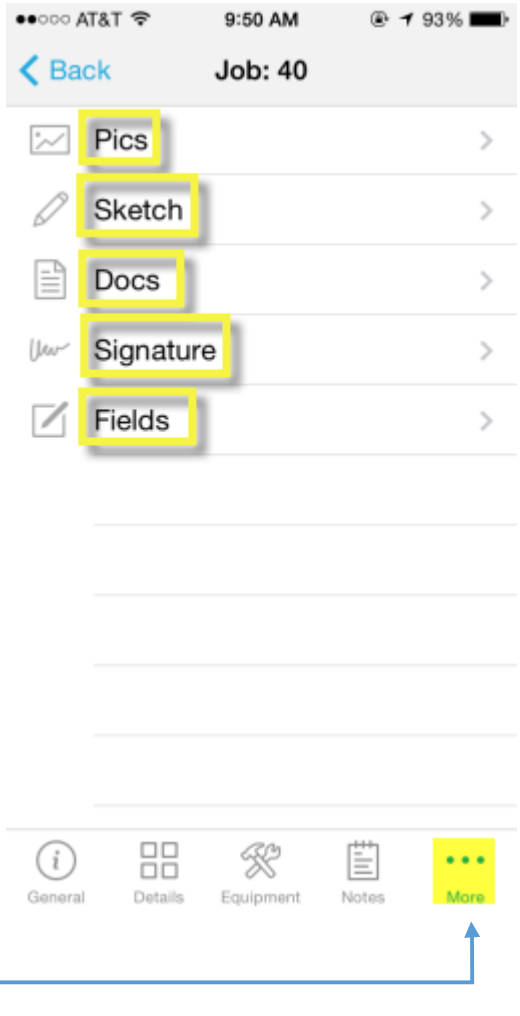
The notes tab allows you to write down any notes you wish on the work order, for private use, or the invoice. Anything you need to write down or note you will be able to do so here.

From the **Notes Tab** you can select either work order, private, or invoice tabs to write in. For the private notes, it will only show up for your employees and the customer will not be able to see what you write in that spot.

Table of Contents

More Tab

The more tab offers you to take pictures, draw sketches, see past documents from the customer, take a signature, and custom fields.

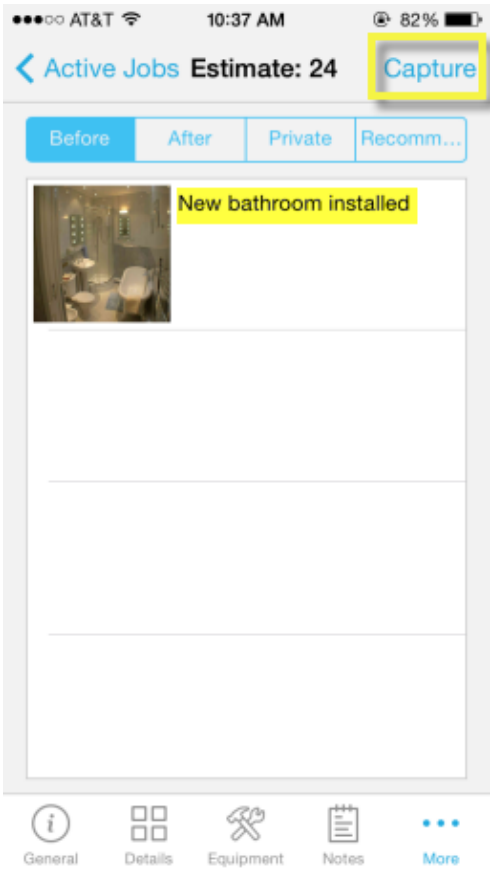


From the **More Tab** you can perform many important tasks such as:

1. Pics – allows you to take before, after, private, and recommendation pictures.
2. Sketch – allows you to draw a sketch and saves it as a picture.
3. Docs – allows you to view previous work orders from the customer.
4. Signature – allows you to get a signature of the customer.
5. Fields – allows you to fill out your custom fields that you have.

Table of Contents

Pics lets you take before the job pictures, after the job pictures, private pictures that only you and your company will be able to view, and recommendation pictures that you can show the customer to recommend a future job.



The capture button lets you take a picture or choose from your photo album to insert into the before, after, private, or recommendation tab. Along with adding and taking pictures, you can write a brief note next to the picture if you would like to note anything to the customer or your company from the private tab.

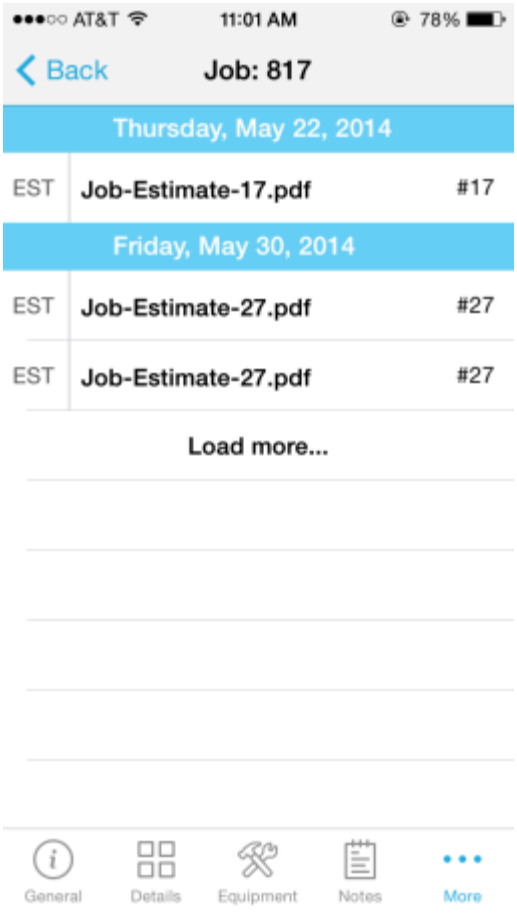
Table of Contents

Sketch is a place where you can draw anything you need by hand instead of taking a picture. Once you have completed your drawing it will capture it and save it as a picture.

The draw button opens up window where it will allow you to draw a picture and select capture which will then save it as a photo. You can also write a brief note next to the picture to specify exactly what it is.

Table of Contents

Docs allows you to view past work orders and documents from the customer to let you know what was done before and any other information you would like to know.



You can click on previous jobs and review what was done.

Table of Contents

Signature lets you capture the customers' signature when the job is completed and is included in the work order. Along with the signature you can add a terms and conditions and write the customers' name along with the signature.

The new signature tab lets you either write the signature, or if you don't like the one that is written you can re-write it with a new one. A name can also be displayed along with the signature to confirm the person.

Table of Contents

Fields allows you to customize any additional information you would like to have during a job or estimate. You can customize this feature in ServiceCEO.

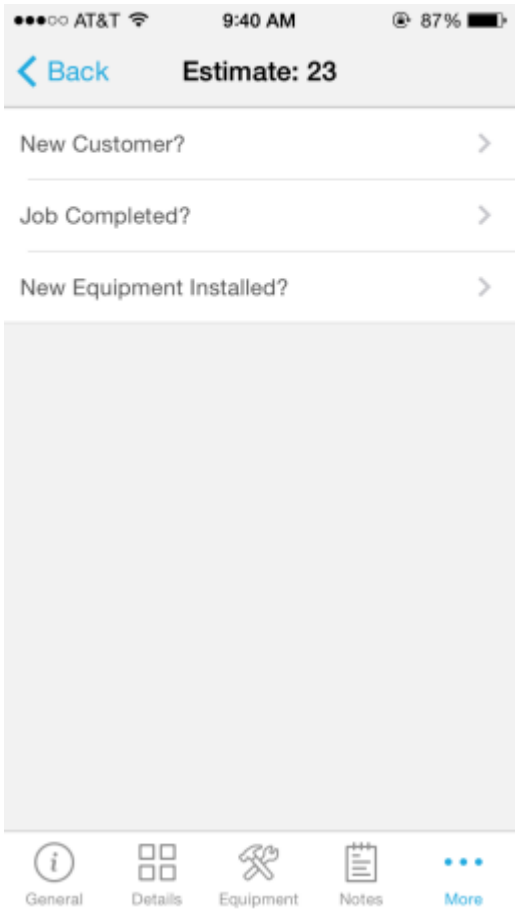


Table of Contents

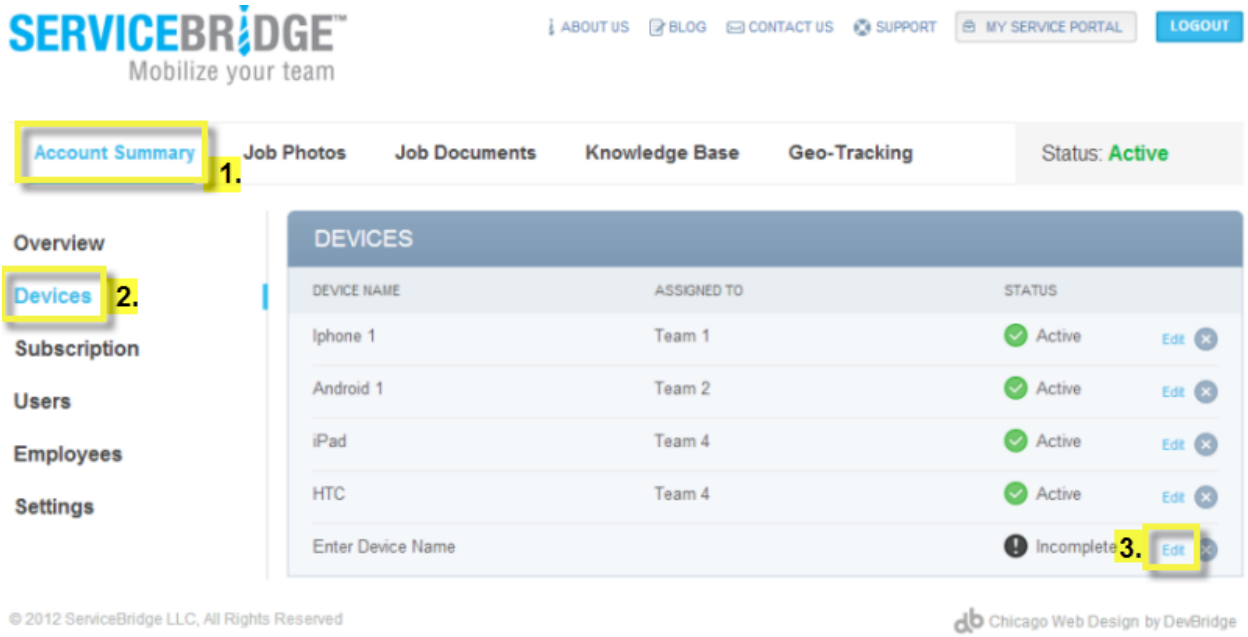
Add a New Job

Description

Add New Job feature allows technicians to create jobs in the ServiceCEO database and Supervisor Role. Technicians can select customer, date, duration, frequency, and summary. Also, technicians can add products, services, and kits, as well as capture photos and signature. When a new job is created and submitted, the dispatch is notified by an email.

Allowing to Add a New Job

Before you can actually add a job from your mobile device make sure you have the device setting for this option enabled. To do that go to your ServicePortal:



1. Go to Account Summary
2. Devices
3. Select the device that you want to Edit

Table of Contents

Winning/Losing an Estimate

Description

If you assign the estimate to yourself it will be displayed in your “Jobs Due Today” and “Estimate Total” in your ServiceBridge app. Also if an Estimate is assigned to you from ServiceCEO you will be allowed to win/lose the estimate.

Win/Lose

From your dashboard you can view your estimates in the Jobs Due Today or the Estimates Total Tab.

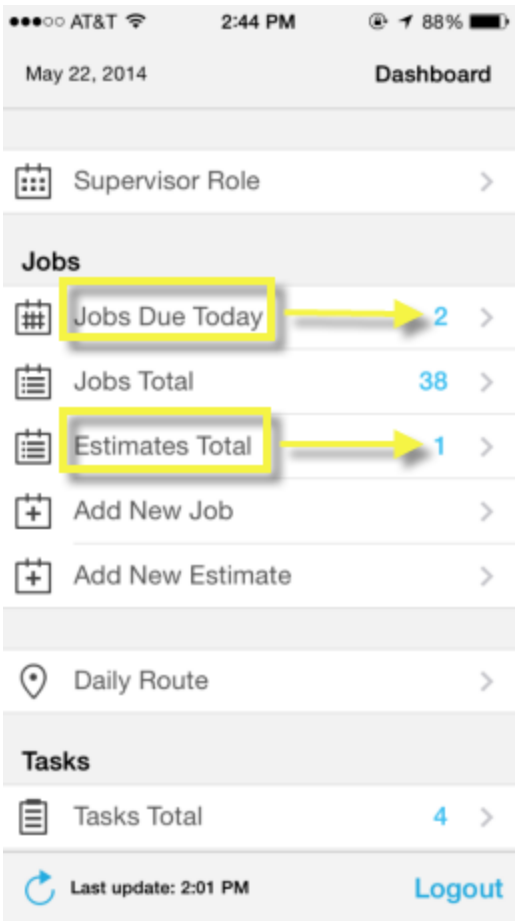

Table of Contents

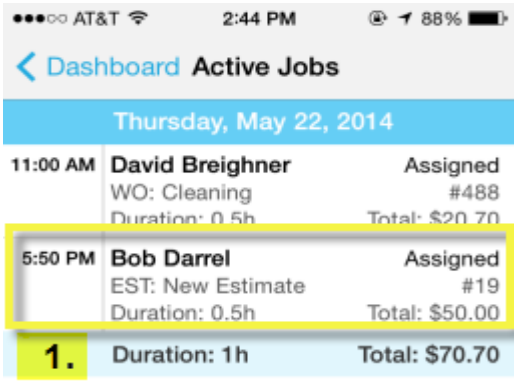
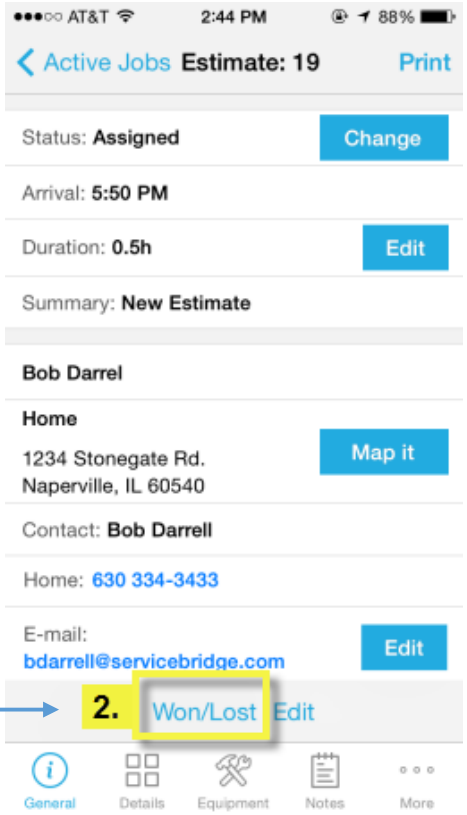
1. Find the Estimate you



2. Click on Won/Lost Estimate



3. Won Estimate

4. Lost Estimate

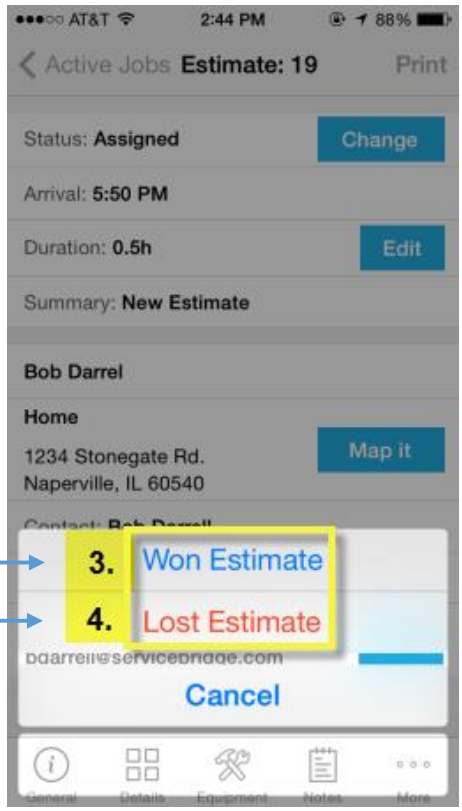


Table of Contents

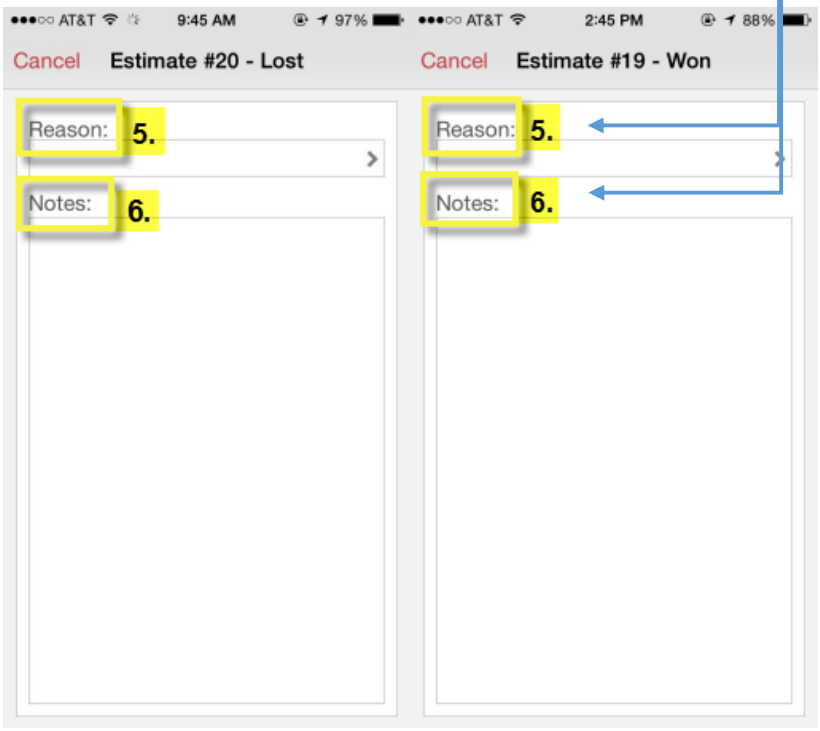
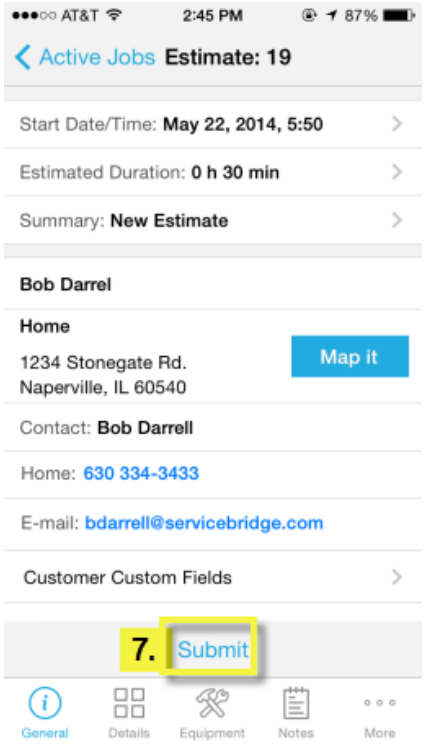
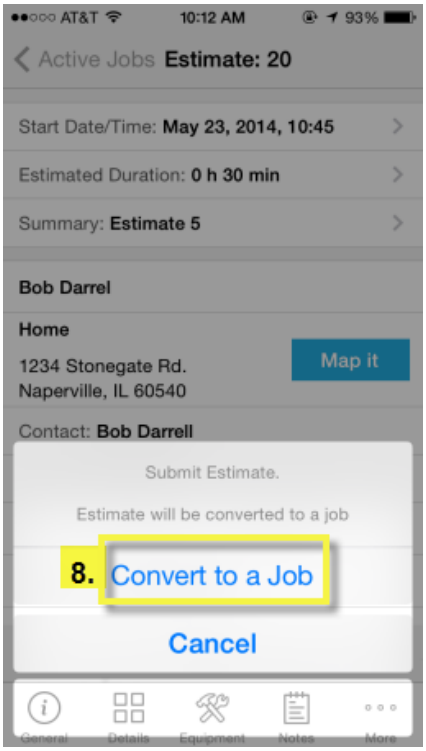
Once you click “Won Estimate” or “Lost Estimate” it will ask you to enter two things.

5. Give a **Reason** for the “Win” or “Loss”
6. Write any **Notes** you might want to have



7. Click Submit to finalize the Estimate
8. Convert to a Job





[Table of Contents]

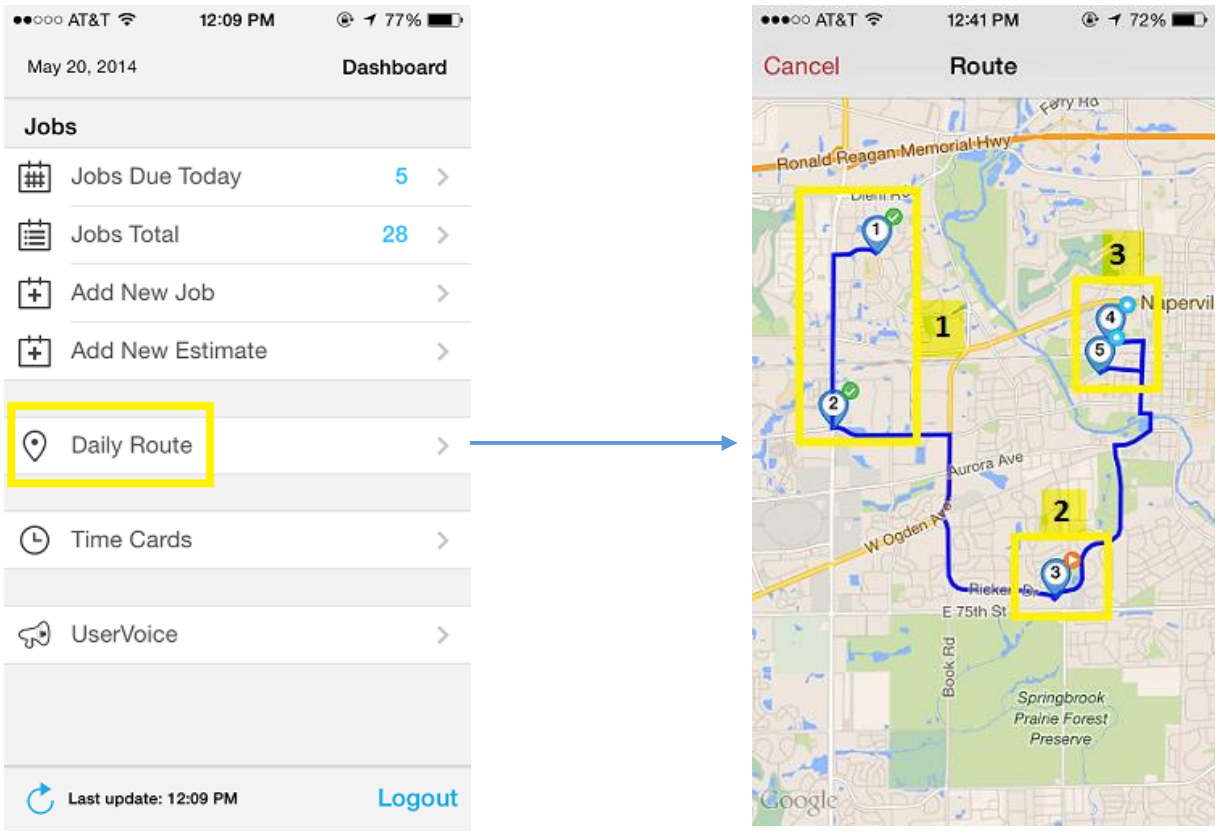
Daily Route

Description

Daily Route feature displays job locations and fastest routes on an interactive map.

Daily Route feature can be accessed from the Dashboard of the ServiceBridge app.
Note: We recommend you to download the Google Maps app, however it will work with your regular Maps app as well.

Daily Route View



1. The green check mark signifies that a job has been finished.

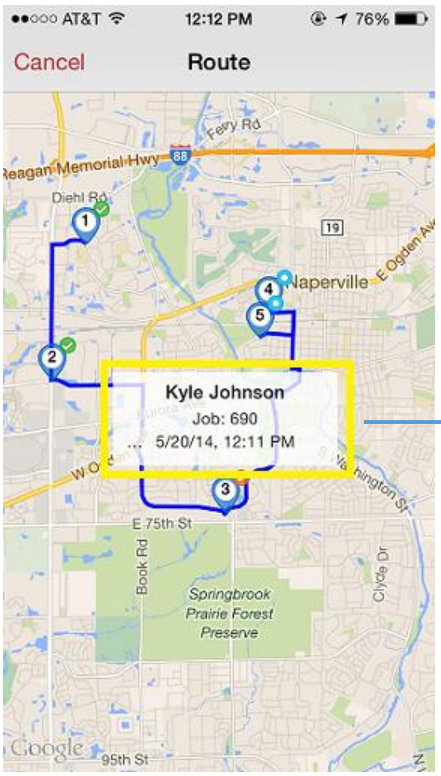
2. The orange triangle shows that a job is in-progress.

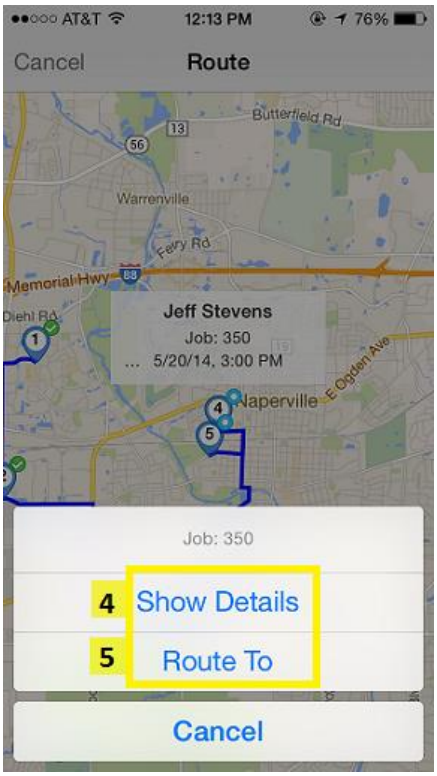
3. The blue circles show that the job is assigned.

Suspended jobs will show up with a red X.

Table of Contents

You can click on a specific job and it will show you a box with minor details like the job number, date, and the time. Or, you can click on the box to open up more options:





4. You can click **Show Details** which will take you to general details of the job or,
5. **Route To** which will open up your navigation so you can navigate to that job.

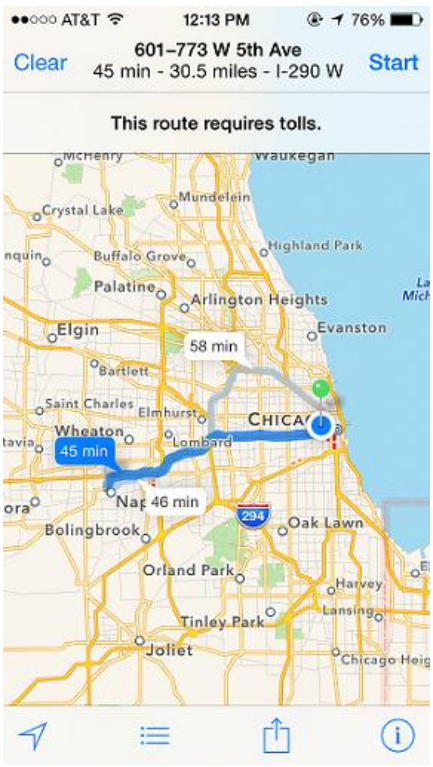


Table of Contents

Time Cards

Description

Time card functionality allows access to the time card information in ServiceCEO database from the app. Technician can edit time blocks that are automatically created based on his schedule, or add additional ones. All information is synced with ServiceCEO in real time.

Accessing Time Cards

Open ServiceBridge application. Tap on the Time Cards button available in the dashboard to view the time cards for members of the team. If the button is not visible contact us to enable this feature for your account, or go to your ServicePortal and enable it in your company settings.

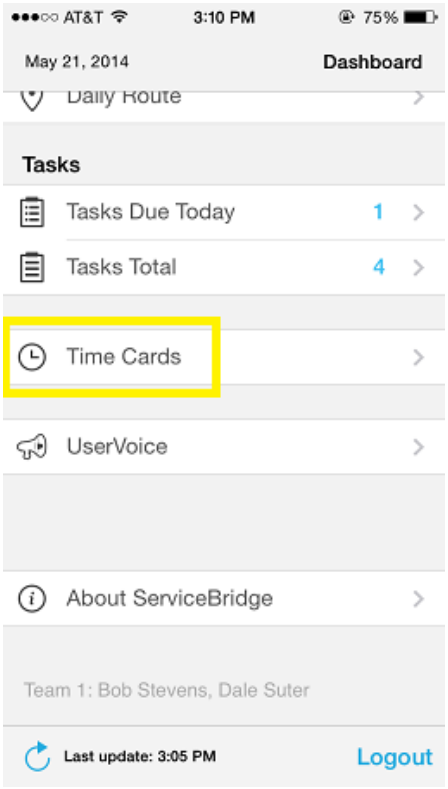

Table of Contents

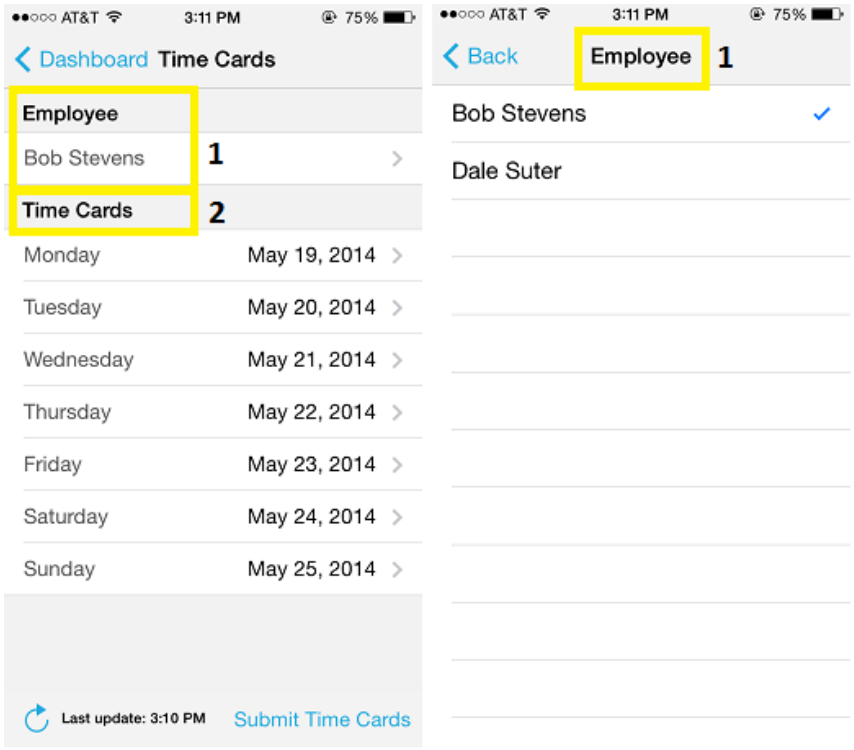
Choose the Time Card which you want to edit:



1. Tap on the employee and it will let you choose the team members time cards
2. The time cards are available Monday through Sunday for the ongoing week. Tap on a day you wish to see the time card information for.

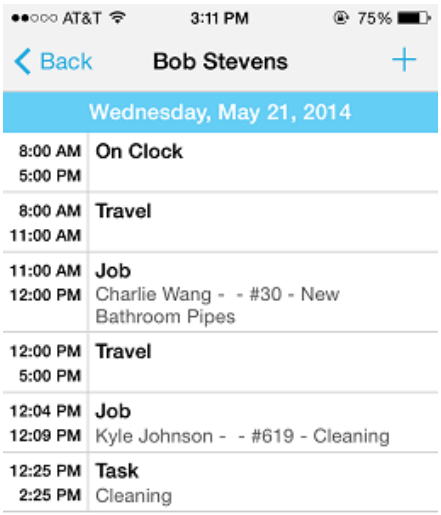


Table of Contents

Edit Time Block

Time block values can also be edited. Tap on a time block your want to edit and detailed time block information will appear on the right.

From the **Details Tab** you will be able to view all of the products/service/kits, as well as add new ones, add price levels, collect payment, and view the total amount owed.

[Table of Contents]

Equipment

The **Equipment Tab** lets you view and install equipment, as well as edit the information about the installed equipment.

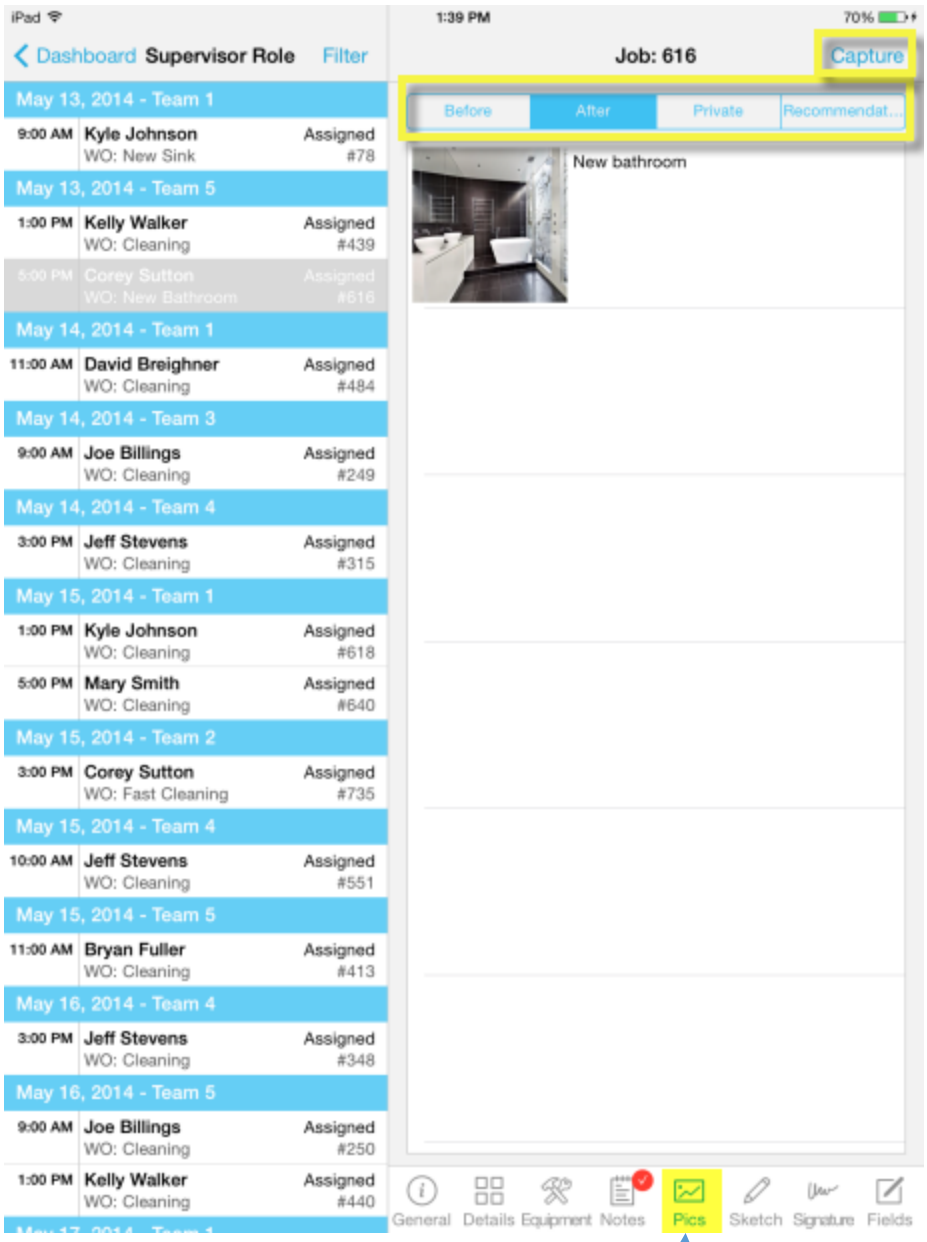
[Table of Contents]

Notes

From the **Notes Tab** you will be able to write down notes for the work order, invoice, and private that only you and your company will see. The customer does not see private notes.

[Table of Contents]

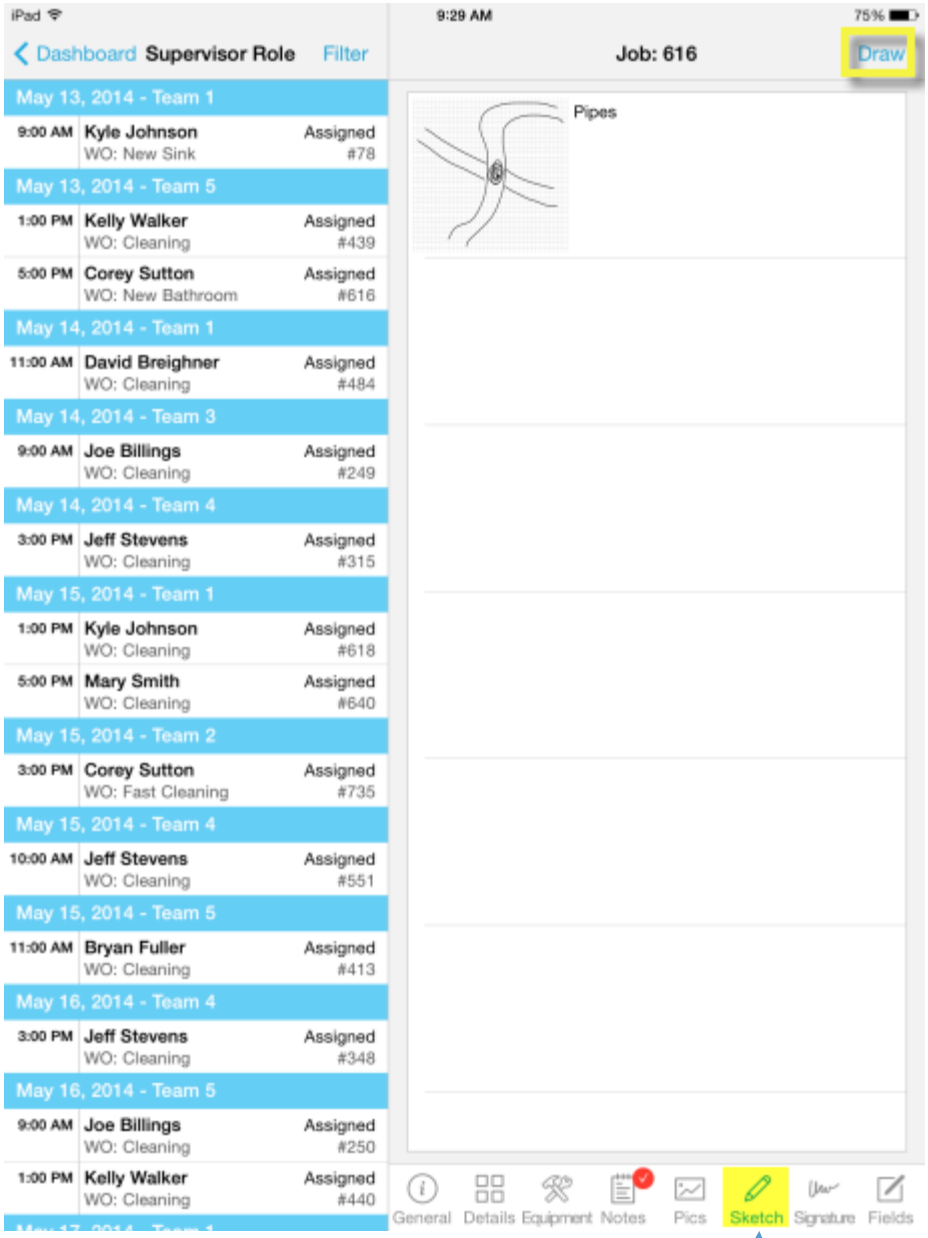
Pics



From the **Pics Tab** you will be able to view, add, and delete photos. You can place pictures in the before, after, private, and recommendation tabs. To add a picture click “Capture” in the top right hand corner. You are also able to add notes next to the picture to ensure the person knows what the picture is about.

Table of Contents

Sketch



The **Sketch Tab** lets you draw a sketch of anything you would like and then write down notes to describe it.

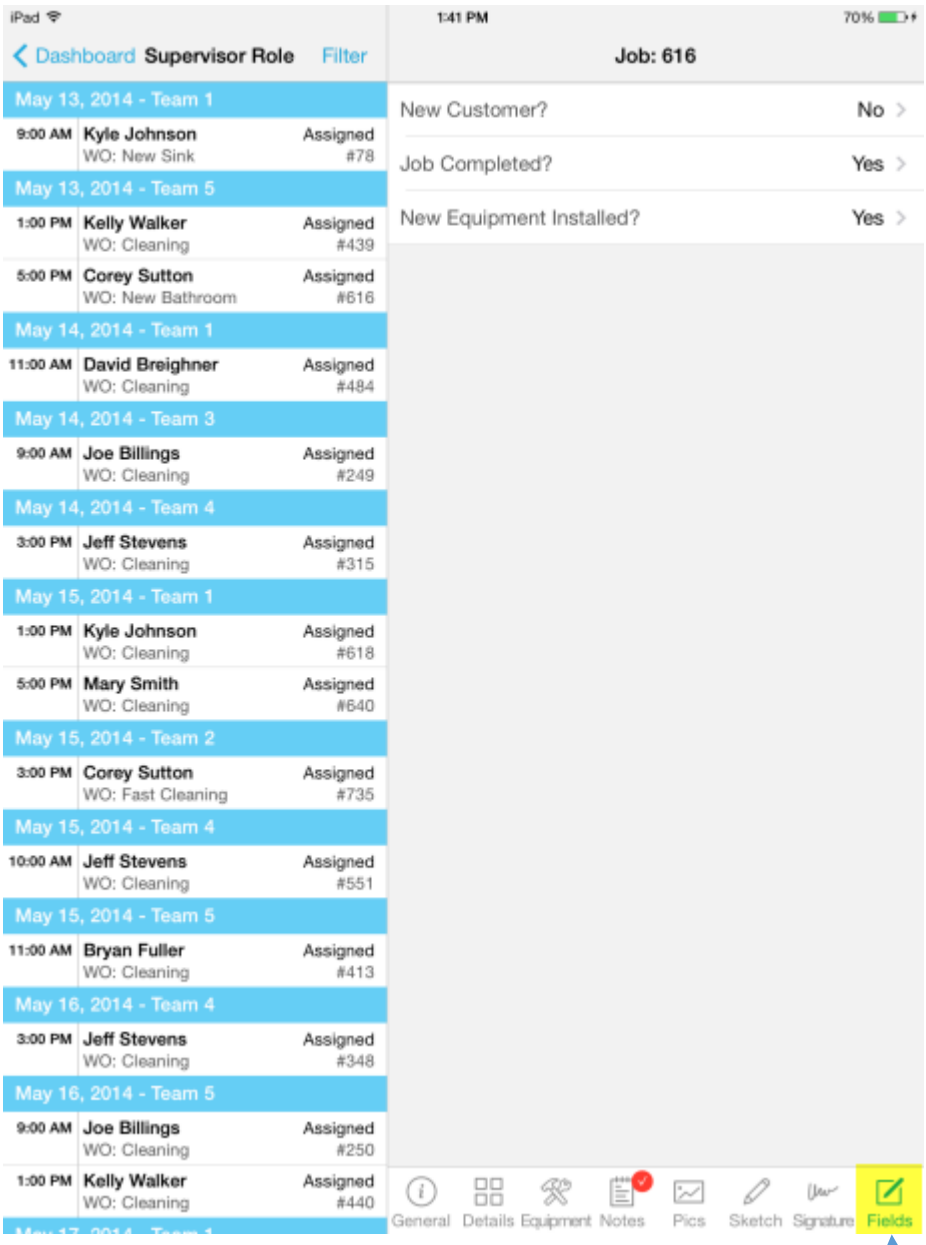
[Table of Contents]

Signature

From the **Signature Tab** you are able to capture the customers' signature. You can click "New Signature" in the top right hand corner which will open up a black screen where you can draw the signature. After you draw the signature it can ask you to write down the customers' name for verification.

[Table of Contents]

Fields



From the **Fields Tab** you can customize any additional information you want to add for the job from ServiceCEO. Once you add these questions or information it can show up in the fields tab.

Table of Contents

Adding a Job or Estimate

Once you click Add New Job or Add New Estimate, it will take you to a window to enter all of the information.

1. First you add the Start Date and Time.

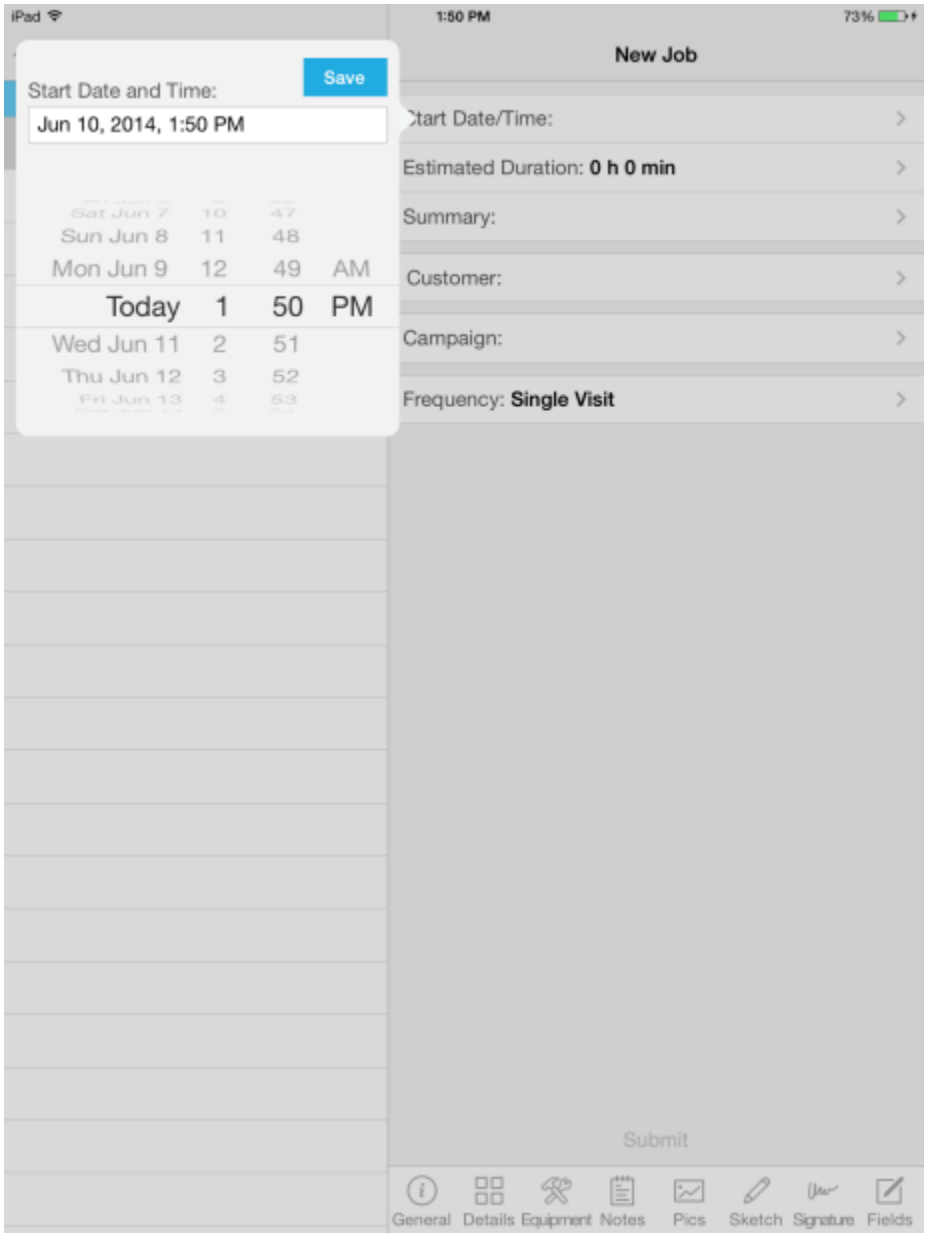


Table of Contents

2. Enter the Estimated duration of the job/estimate.

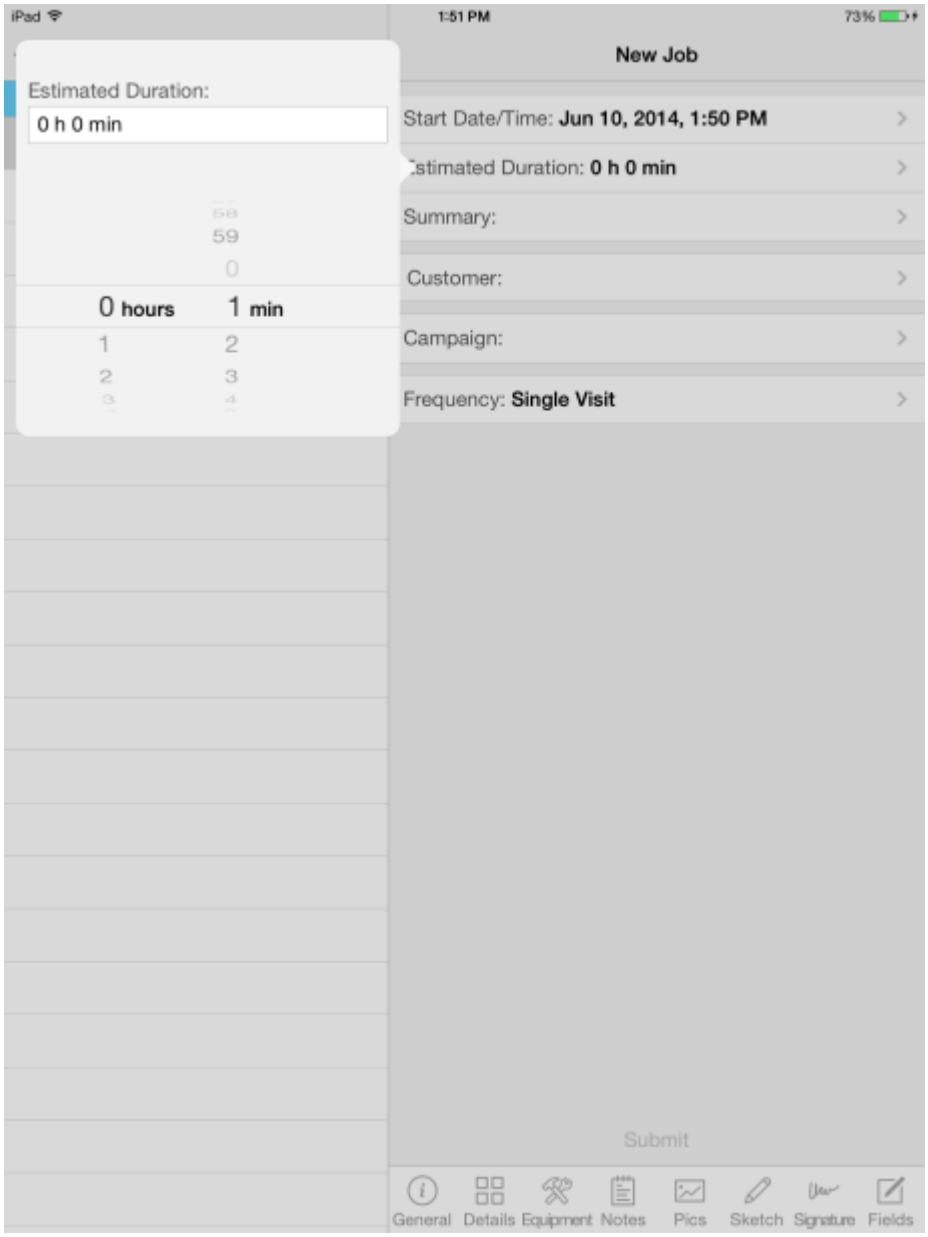

Table of Contents

3. Enter the job summary, or what the job name is.

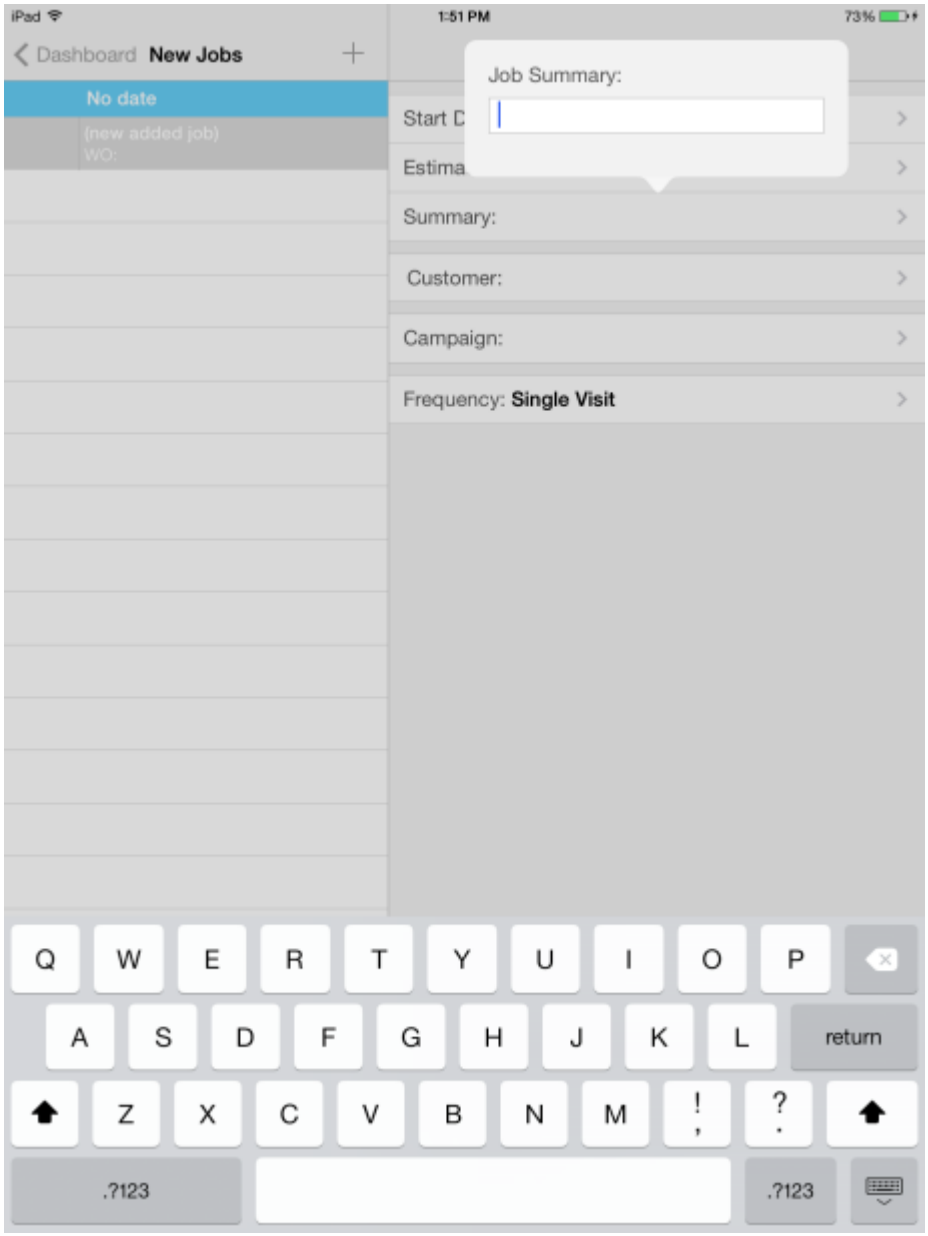

Table of Contents

4. Search for the customer, or add a new one. To search for an existing one simply enter the first 3 letters of the name. To add a new one just click “New Customer”.

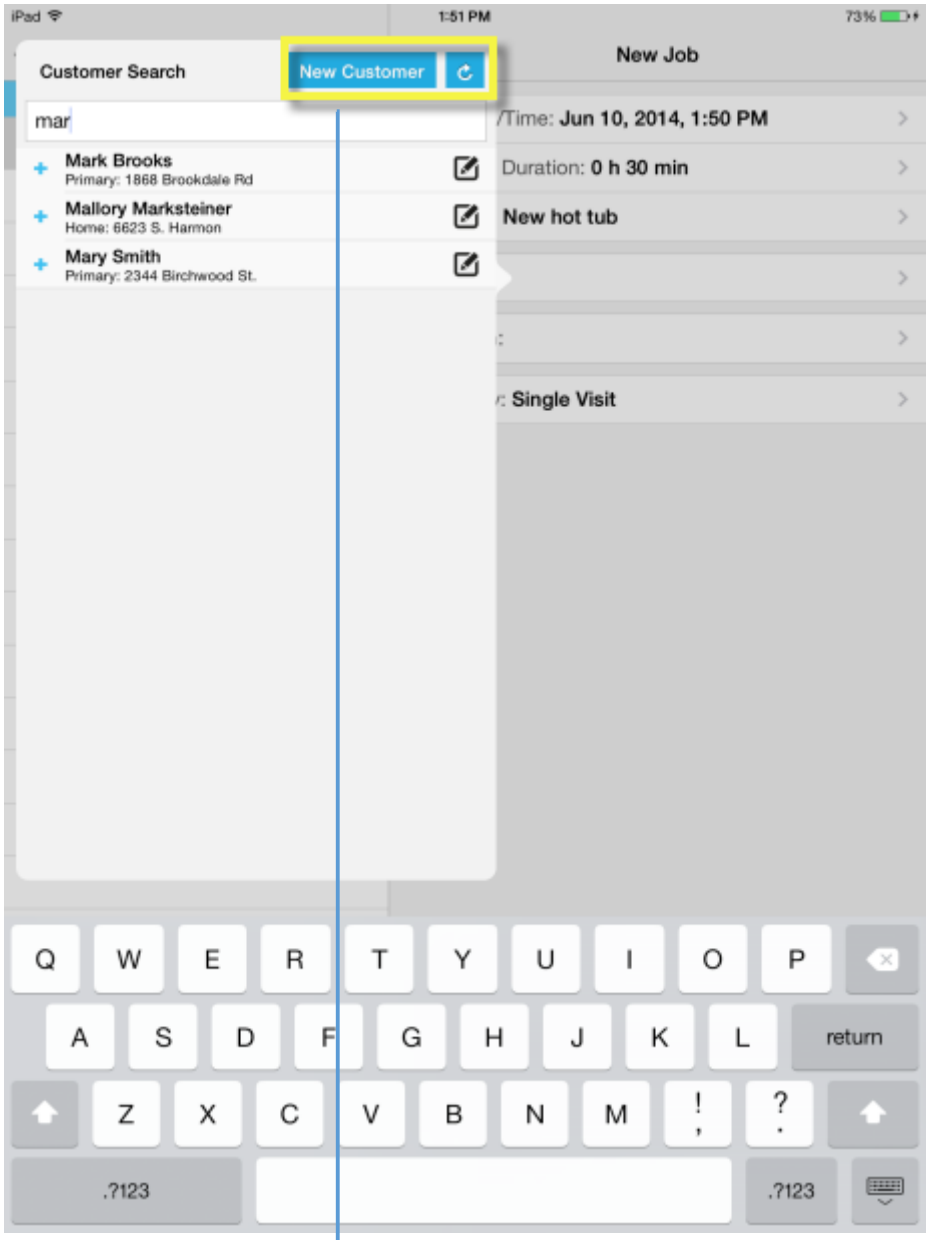

Table of Contents

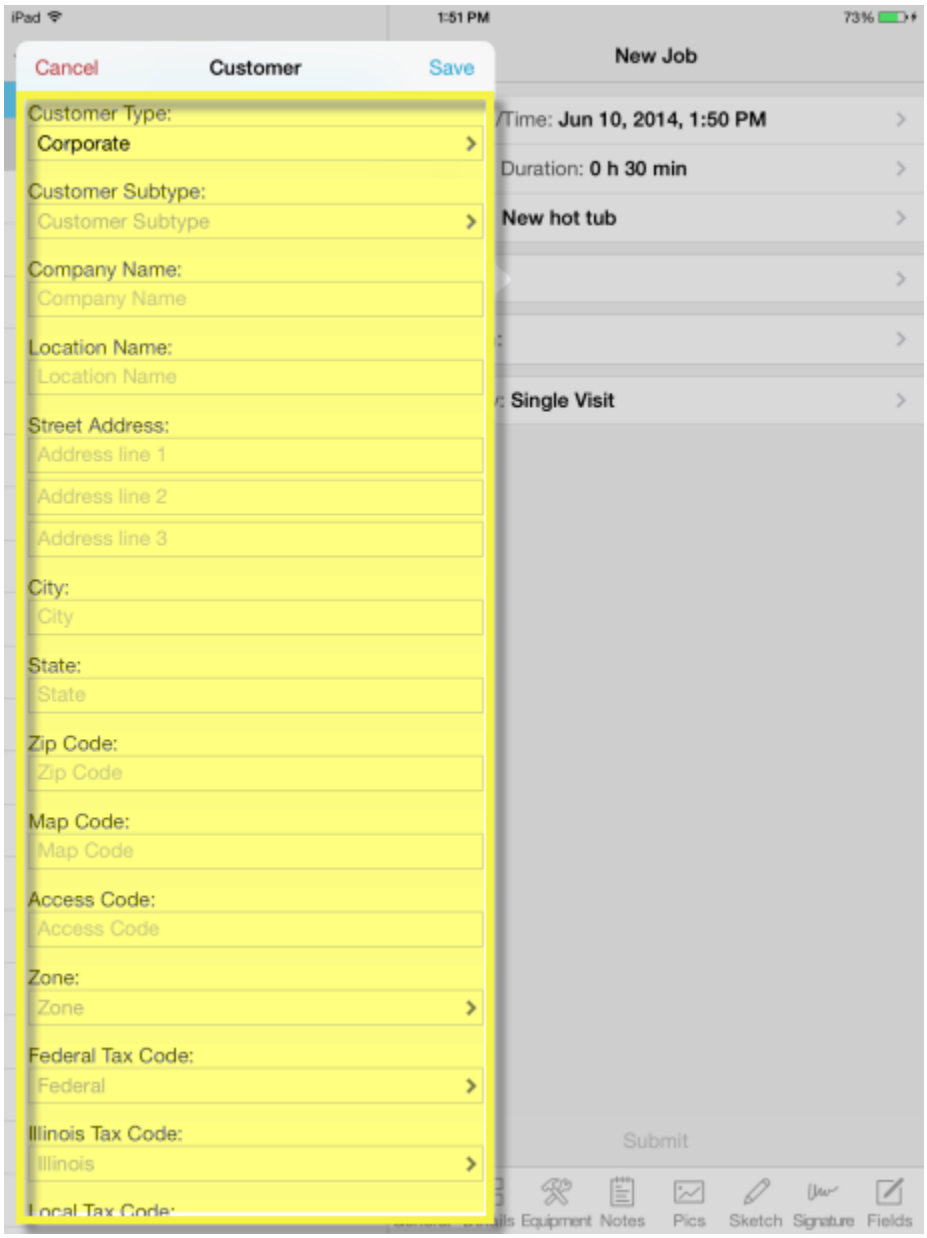

If you click “New Customer” you will be able to add a new one to your database. It will ask you to enter all of the information about the new customer like, customer type, company name, location, zone, tax codes, etc.

Table of Contents

5. Add the campaign if there was one or the marketing strategy used to get the client.

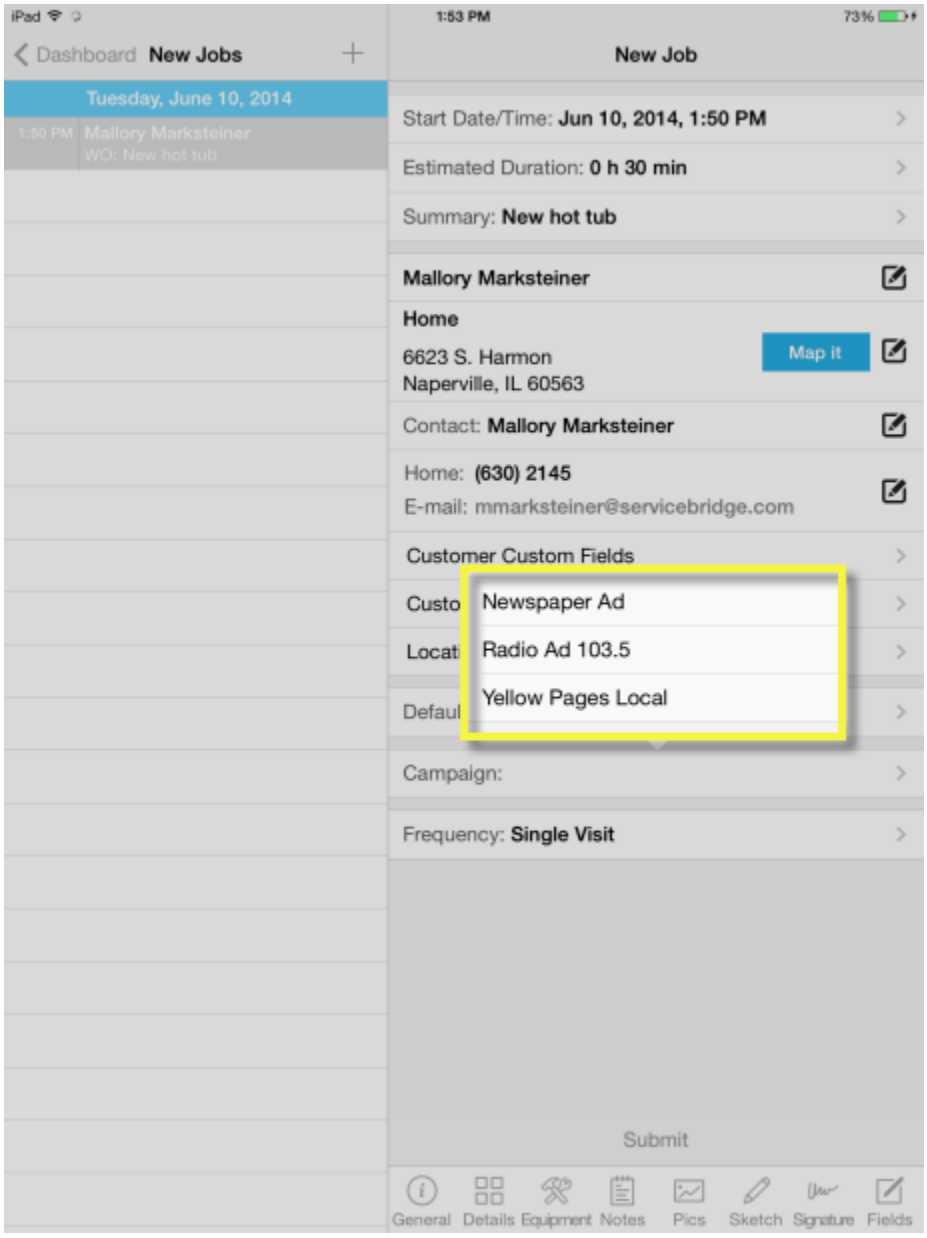

Table of Contents

6. Frequency lets you select how often the visit will be done. You can select from a single visit, daily, weekly, monthly, annually, or custom.
